APNA has produced a suite of resources to help general practices employ nurses and optimise their role in the general practice setting. Fulfilling these aims will help build Healthy Practices that deliver positive outcomes for their communities through nursing skills and expertise.

An effective orientation and induction program should demonstrate the professionalism of your practice and help increase the efficiency of the new employee.

During orientation, the nurse will require information regarding the practice population, how the practice functions, the work systems, and how the clinical and administrative teams work together.

Ideally, an induction pack will include information about the:
- administrative structures and processes, such as reporting lines or organisational chart
- procedures for practical administrative matters, e.g. how to apply for leave
- record management and information systems used in the practice
- quality assurance processes
- professional learning and development opportunities
- policy and procedure manual, including how to access an electronic or printed version of the manual
- induction process and checklist.

Plan for an extensive induction program, which is long enough to allow the nurse to be fully proficient in the practice. See an example of an induction process over a three-month probationary period, which can be used as a guide.

Prepare an agenda for the nurse’s first day. Arrange introductions to staff and times for meeting with staff involved in the induction.

**Example of a three-month induction process**

**Before first day**
- Ensure the new employee has received a contract of employment.
- Establish current registration status online.
- Assign a buddy.
- Send a letter explaining when and where to go on the first day, including parking arrangements (if relevant) and the contact person for the first day (buddy).
- Prepare an agenda for the first day activities and make necessary arrangements with people involved in the induction.

**First day**
- Be punctual, enthusiastic and friendly, remembering first impressions count.
- Explain your role within the practice and in the induction process.
- Give a brief outline of the induction program for the first day and the first week. This will help the nurse as they will have some idea of what to expect.
- Try and provide a timetable for their first two weeks.
- Schedule a date for the three-month interview.
- Work through the induction pack and induction checklist.
Orientation and Induction

**First week**
- Make yourself available to the employee, or ensure that someone can fill this role if you are busy.
- Ensure the employee has:
  - read and signed the employment contract
  - signed and returned payroll forms
  - completed an immunisation and infection disease assessment form
  - completed the induction checklist, signed by the buddy and filed in the personnel file.
- Plan and agree on a series of goals and activities for the employee to undertake in the probationary period.

**During first month**
- Consideration should be given to arranging regular meetings (at least once a week for 15 minutes) so you can answer any questions the employee may have and provide some general feedback.
- To reduce the likelihood of feeling isolated after the initial high contact in the first week, the buddy should try to touch base with the employee by holding informal meetings (over coffee or lunch).

**After three months**
- The end of the three-month period is an ideal time to formally discuss the employee’s progress.
- Review the plan of agreed goals and activities to ensure any that are outstanding are worked into a professional development training plan for the first year.
- Good work should be recognised and any remaining transitionary issues should be resolved.

---

**Induction checklist**

BU = buddy; SU = supervisor; PM = practice manager, RE = receptionist

</table>

### First month

- **Clinical care**
  - Perform clinical role building up to a full workload over an agreed period of time.
  - BU SU PM RE

- **Activity planning**
  - Identify key areas for learning over the next three months.
  - Document in activity plan.
  - BU SU PM RE

### Second month

- **Meeting**
  - Discuss how induction period is progressing for both parties.
  - Address any identified issues.
  - BU SU PM RE

### Third month

- **Meeting**
  - Discuss how induction period is progressing for both parties.
  - Address any identified issues.
  - Complete probationary performance review, if appropriate.
  - BU SU PM RE

- **Activity planning**
  - Review the plan of agreed goals and activities and ensure that any that are still outstanding are worked into a professional development/training plan for the first year.
  - BU SU PM RE
